

MD FAIZ AHMAD

Security Intern — AD & Cloud Red Teaming

Ranchi, Jharkhand | +91-6203654830 | mdfaizahmad678@gmail.com | LinkedIn | GitHub

PROFILE SUMMARY

Cybersecurity graduate focused on Active Directory and cloud red teaming. Built and documented a full AD attack lab covering Kerberoasting, LLMNR poisoning, Pass-the-Hash, and Golden Ticket attack chains with BloodHound-based path mapping, and is currently extending this into Azure/Entra ID misconfiguration and privilege-escalation research. Hands-on VAPT experience across 10+ web applications and NIST 800-171 compliance gap analysis. Ranked top 1% globally on TryHackMe. Seeking a Security Intern role focused on AD and Cloud Red Teaming to contribute to real-world adversary simulation work.

CORE SKILLS

Offensive Security: Vulnerability Assessment & Penetration Testing (VAPT), Web Application Security (SQLi, XSS), Active Directory Attacks (Kerberoasting, LLMNR Poisoning, Pass-the-Hash, Golden Ticket), Attack Path Mapping (BloodHound)

Security Tools: Burp Suite, Nmap, Metasploit, Wireshark, Mimikatz, Responder, BloodHound, SIEM (Elastic basics)

Compliance & Blue Team: NIST 800-171 Gap Analysis, SOC Analysis Fundamentals, Cloud Security (Azure/Entra ID fundamentals; actively building hands-on cloud red team skills)

Programming: Python, C++, JavaScript

Operating Systems: Linux (Kali), Windows / Windows Server 2022

EXPERIENCE

Security Intern | Senslearner Technology, Uttarakhand

Jun 2023 - Jul 2023

- Performed vulnerability assessments and penetration tests across 10+ web applications, identifying 9 findings (5 critical, 3 medium, 1 low) including SQL injection and cross-site scripting (XSS).
- Executed 5+ full penetration testing engagements simulating real-world attacker behavior, documenting exploitation paths and remediation guidance for development teams.
- Partnered with developers in weekly security reviews to translate findings into secure-coding and hardening practices.

Security Compliance Trainee | TIQHUB, Virginia (Remote)

Sep 2024 - Jan 2025

- Performed security gap analyses against NIST 800-171 and related frameworks, mapping current-state controls to target-state requirements for client organizations.
- Authored detailed compliance and risk-assessment reports used to guide remediation planning and audit readiness.

FEATURED RED TEAM PROJECT

Active Directory Attack Lab | Windows Server 2022, Windows 10, Kali Linux, VMware, BloodHound, Mimikatz

Write-up: github.com/Sudobash-anonymous/Active-directory-lab

- Built an enterprise-scale Active Directory lab with a Domain Controller and 2 domain-joined Windows 10 clients to safely simulate real intrusion scenarios.
- Executed and documented common AD attack chains: Kerberoasting, LLMNR poisoning (Responder), Pass-the-Hash, and Golden Ticket attacks.
- Mapped privilege-escalation and lateral-movement paths using BloodHound, then authored mitigation recommendations mirroring real Red Team engagement deliverables.

Azure Cloud Red Team Lab (In Progress) | Microsoft Azure, Entra ID, PowerShell/Az CLI

- Building a hands-on Azure red team lab to practice common cloud attack paths: over-privileged service principals, exposed storage accounts, and Entra ID role/permission misconfigurations.
- Documenting each attack chain and corresponding detection/mitigation guidance, following the same methodology used in the on-prem AD lab; write-up to be published on GitHub.

OTHER PROJECTS

Steganography Tool — Python/Java

- Built an encrypted data-concealment tool across JPEG/MP3/PNG formats and improved resistance to steganalysis detection by 20%.

Web Tester — *HTML, CSS, JavaScript, Firebase*

- Built a web application testing tool for bug/vulnerability identification, reducing post-launch defects by 30%.

CodeGPT — *HTML, CSS, JavaScript, OpenAI API*

- Built an AI-powered code-completion platform with multi-language support, improving development speed by 20%.

CERTIFICATIONS

- Certified AppSec Practitioner (CAP) — Secops Group
- Certified Network Security Practitioner (CNSP) — Secops Group
- Certified SOC Analyst Foundation — SIEM-XPERT
- Certified Ethical Hacking Essential — CodeRed
- IBM Cybersecurity Analyst — Coursera

ACHIEVEMENTS & ACTIVITIES

- Ranked top 1% globally on TryHackMe — profile: tryhackme.com/p/mdfaizahmad
- Developed a security-focused solution at the Great AppSec Hackathon 2024, identifying and mitigating web application vulnerabilities.
- Founded and manage QUANSIC, a cybersecurity YouTube channel (400+ subscribers) covering secure coding and penetration testing tutorials.

EDUCATION

B.E./B.Tech, Computer Science and Engineering | *Chandigarh University, Punjab* 2020 - 2024
CGPA: 7.1

Intermediate (PCM) | *Sri Chaitanya Jr College, Hyderabad* 2017 - 2019
Percentage: 87%

PUBLICATION

- "Entertainment App using React JS" — Published in IJNRD, April 2024. Developed a media streaming application focused on front-end performance and UX.
